

Brain Factory

Soul Movie Offices

Interior Design/Bronze

The Soul Movie Entertainment is a company that provides production services and post audiovisual production with a brand with a strong urban footprint: a review of the well-known symbol of the London Underground. This strong trait gives the opening words to the creation of a space that reinterprets the innovative urban concept of "UNDERGROUND" by exploring chaotic flow lines conveyed in metro stations. The decor inside each office audio-video production is coordinated to the color of specific metro line in addition to being studied in detail. An element of a break with the classic suburban environment is the green grass cuttings and bamboo plants adorn the offices, giving an added value in terms of comfort, harmony and sensory pleasure.

Akad

Face Top Clinic

Interior Design/Bronze

The design of this project started to reduce stress and anxiety and also inspire patients with comfort. On this basis, destruction of all blades and internal walls due to need of the formulated project for accurate implementation of the physical program and redesign of the internal micro spaces based on continuous surface method and use of lines and curve surfaces instead of sharp and angled lines and also utilization of mild cold color (blue, gray and white) as the main tone of space.

JOI-Design

Diamond Ballroom - O2 World Berlin

Interior Design/Bronze

With subtle allusions to the clandestine allure of an exclusive members' club in the "roaring twenties", JOI-Design's concept for the Diamond Ballroom, a glamorous new VIP lounge at the O2 World Berlin, evokes the dazzle promised by its name. Warm hues of gold, platinum, cognac and ebony create a handsome, clubby feel. The Diamond Ballroom can be used as one generously proportioned single space or for smaller events it can be divided into two distinct places with their own entrances. JOI-Design has shaped a sophisticated atmosphere from which VIPs may enjoy a relaxed visit to the O2 World Berlin.
