5.

### 1. Airdrop

Designer: Edward Linacre

This innovative irrigation tool catches water vapour as it rises, cooling it to soil temperature and hence back into plant-nourishing H<sub>2</sub>O, which is stored in an undersoil tank. The drought-alleviating gizmo scooped Edward Linacre the James Dyson Award for 2012.

### 2. Self Rescue Bracelet

Designers: Wu Xuexing, Zhu Linghui, Zhu Peizheng  
Marine safety "shag band" inflates into a rubber ring when pulled.

### 3. Blind Spot

Designer: Selene Chew  
This white cane detects obstacles using sensors and finds friends using Foursquare. Yes, really.

### 4. Network Tube

Designers: Son Kijo and team  
Rubber rings with built-in magnets that group together to aid rescue.

### 5. Omni-Guard Air Bag Suit

Designer: Singapore University of Tech and Design  
Comedy fat suit inflates as you fall, cushioning your landing.

## FOOD AND DRINK

Tasty creations for your Jetsons kitchen

### 2. BBQ 360°

Designers: Marco Marotto, Paola Oliva  
Easy-clean, portable barbecue with storage space for utensils.

2.

3.

### 3. Warm N' Cool Box

Designer: Arthur Kenzo  
Lunchbox-sized fridge not only keeps leftovers fresh but can also reheat them via thermo-electric batteries charged by the refrigeration process.

4.

5.

### 4. Urban Beehive

Designer: Philips  
The Fidelio brand invents an indoor beehive shaped like a beekeeper's mask – meta. Enjoy the honey; don't watch *My Girl*.

### 5. Egg Separator

Designer: Tommy Hawes  
Put in an egg, twist, and the white and yolk are separated – very handy for meringue bingers.

### 1. LiquiGlide

Designers:

J David Smith and team

Solving world famine is all very well and good, but what about *really* serious problems, like ketchup that won't come out of the bottle? LiquiGlide is a flavourless, slippery coating that can be applied to any food container.
